

# KINDERGARTEN

## Earth Science - SKE2

- Observe as staff dips water and soil out of the wetlands and be asked to describe texture, color, smell, etc.

## Life Science - SKL1

- Learn how living organisms interact with other living and non-living components of their habitats
- Act out a story to learn how a non-living object (dead leaf) grows a living organism (fish)

## Life Science - SKL2

- Discover how wildlife can be grouped (scales vs feathers vs fur, color/pattern, size/shape, etc.)
- Observe how trees and plants in wetlands are different from trees and plants in park
