

# Middle School

## Life Science - S7L4

- Use the wildlife of the ECO Center to discuss how the specific organisms interact with each other and their habitats
- Give examples of predator-prey relationships, competition, mutualism, etc.
- Participate in activities that demonstrate carrying capacity, resource availability, population health, etc.
- Discuss the aquatic biodiversity of Rome's freshwater river systems

At this time, the ECO Center is unable to address the Physical Science standards of 8th Grade. For questions or additional middle school science standard suggestions, please email Sarah at [sjohnson@romega.us](mailto:sjohnson@romega.us)
