

2nd Grade

Earth Science - S2E3

- Discuss how extreme weather changes and humans can cause positive, negative, or neutral impacts on specific wildlife and their habitats
- Use examples of impacts from river flooding, droughts, human overuse of resources, native vs non-native species, etc. in regard to ECO Center wildlife and wetlands

Life Science - S2L1

- Discuss life cycles of ECO Center wildlife (fish, turtles, snakes, frogs, etc.)
- Use the observation bee hive to study honey bee life cycle and how animals and insects disperse seeds/pollinate
- Play games/activities that demonstrate the standard
