

3rd Grade

Life Science - S3L1

- See and discuss various wildlife in ECO Center and which geographic regions they are or are not found (and why); examples - trout (Blue Ridge), American alligator (Coastal Plains), plus statewide wildlife
- Visit exhibits in ECO Center that display realistic habitat characteristics
- Use plant and wildlife examples in wetlands to learn about external features and adaptations
- Play games/activities focused on migration, camouflage, etc.

Life Science - S3L2

- Incorporate sustainability education with Keep Rome-Floyd Beautiful Program Coordinator
- Games, activities, and lessons based on different forms of pollution and their effects on habitats
